

YANGAZU INC

COMPANY PROFILE

2026

YANGAZU INC COMPANY PROFILE

Company Overview

Yangazu Inc. is an elite software and AI development firm. We specialize in engineering secure, scalable cloud infrastructure and leveraging proprietary artificial intelligence to unlock complex data insights for large enterprises. Our core value proposition is simple: We bring the COMPUTE to the competence. We ensure your business operates on the highest level of technical precision, turning data into definitive action and securing your systems for tomorrow's challenges.

CORE VALUES

Innovation

We aggressively pursue new algorithmic breakthroughs and engineering methodologies to deliver solutions that are not just current, but predictive of the future needs of the enterprise.

Security

We are uncompromising guardians of our clients' data and infrastructure. Every line of code and every system architecture is designed and deployed with security as the highest priority default.

Integrity

We uphold the highest ethical standards in our AI development and client partnerships. Our work is characterized by transparency, honesty, and accountability in both design and delivery.

Excellence

We commit to world-class technical execution. We strive for precision in our software engineering and measurable, superior results in every AI solution we deliver.

Reliability

Our clients depend on the stability and performance of our systems. We deliver robust, scalable architecture that operates without failure, ensuring continuous, high-fidelity business operations.

Customer-Centricity

We align our success directly with the success of our clients. We actively listen and partner with our enterprises to deliver tailored AI and software solutions that solve their unique, most pressing challenges.

PRODUCTS

Proprietary Software Products

CrediHub: A comprehensive Loan Management System designed specifically for Microfinance Institutions (MFIs) and SACCOs (Savings and Credit Co-operatives). It provides end-to-end functionality for loan origination, repayment tracking, reporting, and integrated Shares management.

The screenshot shows the CrediHub dashboard for CHILAWO FINANCIAL SERVICES. The interface includes a sidebar menu with options like Dashboard, Customers, Accounts, Loans, and Reports. The main content area displays a welcome message for 'Yangazul' and a date of 'Sunday, November 16, 2025 17:16:59'. Key metrics are shown in a grid: Total Members (1), Total Savings Balance (MWK 0.00), Total Loans Disbursed (MWK 30,000,000.00), and Gross Loan Portfolio (MWK 30,000,000.00). Below this, there are sections for Interest & Fees Generated (N/A), Repayment Rate (N/A), and Portfolio at Risk (>30d) (MWK 0.00). A 'Loan Activity (Monthly)' chart is present, showing loan amounts disbursed vs. repaid. A 'Recent Activity & Alerts' section indicates 'No recent activity'.

NkhokwePlus: A specialized software solution tailored for Village Banks (Village Savings and Loan Associations - VSLAs) to efficiently record, track, and manage all member transactions and savings.

The screenshot shows the NkhokwePlus website landing page. The header includes the logo, navigation links (Features, How It Works, Pricing, Agents, FAQ), and a 'Sign Up Free' button. The main content area features a large heading: 'The Digital Foundation for Your Village Savings Group'. Below this, a sub-heading reads: 'NkhokwePlus brings professional-grade financial tools to your Nkhokwe (VSLA). Securely manage members, contributions, loans, and dividends with unparalleled transparency and efficiency.' Two buttons are visible: 'Start a 14-Day Free Trial' and 'Explore Features'. To the right, there is an image of a stack of coins and a clock. Below the main content, a section titled 'A complete toolkit for your village bank' states: 'From basic savings to complex loan management and dividend distribution.' Three feature boxes are listed: 'Member & Savings Management' (Securely invite members, track savings with an approval workflow, and view real-time balances for every member and the group.), 'Advanced Loan Management' (A multi-step officer approval process, automated balance tracking, fee application, and loan rescheduling capabilities.), and 'Professional Accounting' (Utilize a full Chart of Accounts, record complex transactions with Journals, and generate detailed financial reports.).

Bespoke Software Engineering Solutions

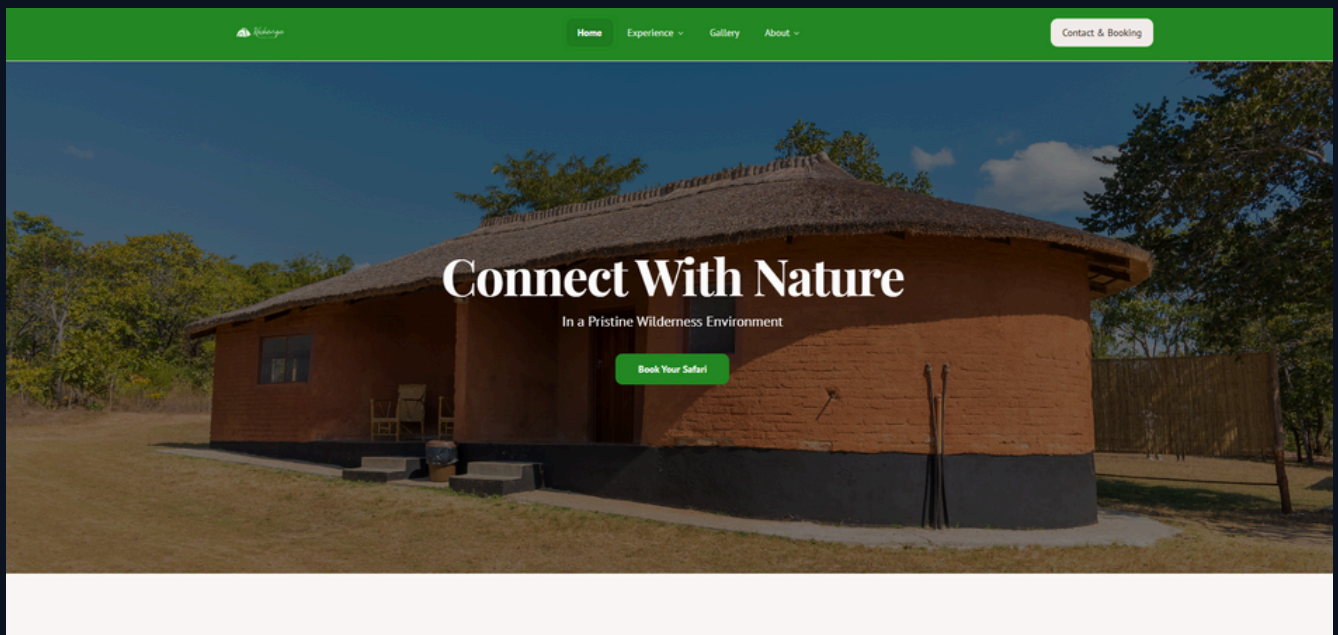

Custom Software Development (Software-as-a-Service): We develop and deploy custom, scalable software solutions for any industry or operational requirement, delivered under a Software-as-a-Service (SaaS) model. Our engineering team transforms complex business needs into robust, reliable, and secure proprietary systems.

- **Core Competency:** Full-cycle development, system architecture, data solutions, and system modernization.

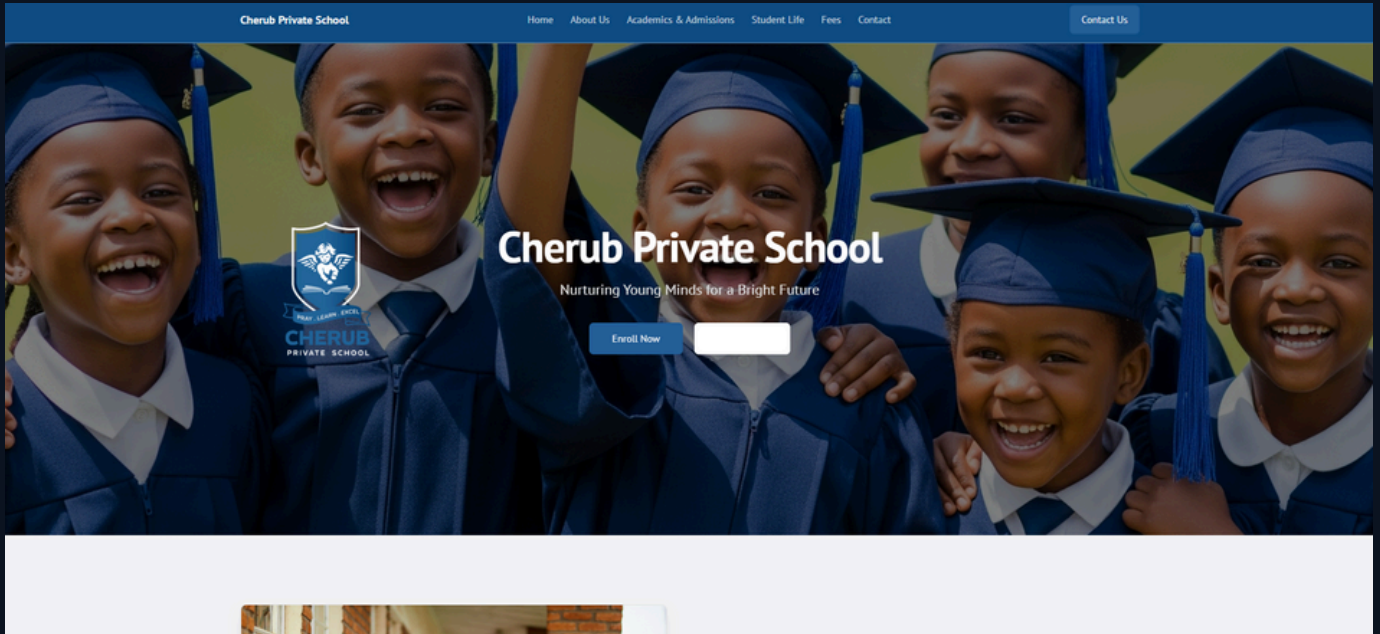

Strategic Digital Design & Identity

Enterprise Web Presence & Digital Development: Designing and engineering professional, secure, and high-performance websites and digital platforms tailored for corporate and commercial needs.

[Kachenga Bush Camp Website](#)

Cherub Private School

Corporate Digital Identity Packages: Creating foundational digital assets, including logos, brand style guides, digital stationery, and professional collateral, that ensure a cohesive and high-end market presence for our clients.

KEY CLIENT BENEFITS

We Offer...	Which Means You Get...
Architectural Rigor & Scalability	Future-Proof Solutions: Software systems that are engineered to handle exponential growth and changing market demands without requiring immediate, expensive overhauls.
Proven Security Protocols	Mitigated Risk & Trust: Confidence that your vital business data and operations are protected by the same high-security standards used in our financial products (CrediHub).
Data-Driven Efficiency	Optimized Operations: Custom software designed not just to automate tasks, but to streamline entire workflows, eliminating manual errors and boosting productivity across your organization.
Full-Cycle Partnership	End-to-End Support: We handle everything from concept and design (UX/UI, digital identity) to deployment and ongoing management (DevOps), ensuring seamless project execution.

DUAL CLOUD TECHNOLOGY

At Yangazu Inc., we architect our solutions using a robust, hybrid cloud environment centered on Firebase and Amazon Web Services (AWS). This dual-stack approach ensures we deliver optimal performance, security, and scalability tailored to each project's specific needs.

1. Core Infrastructure & Backend Services: Amazon Web Services (AWS)

We leverage AWS for its unmatched breadth of services, global scale, and enterprise-grade security for mission-critical applications.

- **Compute & Scale:** Utilizing services like EC2 (Elastic Compute Cloud) and Lambda (serverless computing) to ensure high availability and efficient resource utilization for data processing and custom application backends.
- **Secure Data Storage:** Employing highly reliable and scalable database solutions such as RDS (Relational Database Service) and S3 (Simple Storage Service) for secure, compliant, and durable data storage.
- **Networking & Security:** Implementing enterprise-level virtual private clouds (VPC), identity management (IAM), and advanced firewall protection to safeguard all hosted solutions.

2. Rapid Development & Real-Time Functionality: Google Firebase

We use Firebase to accelerate development, manage user authentication, and deliver real-time experiences efficiently, particularly for our mobile and web applications.

- **Real-Time Data & Synchronization:** Utilizing Firestore or Realtime Database to power dynamic, fast-loading applications like our financial products (\$CrediHub\$ and \$NkhokwePlus\$).
- **Authentication & User Management:** Implementing secure, fully-managed user authentication, minimizing development overhead and maximizing security compliance.
- **Hosting & Deployment:** Providing fast, secure, and scalable web hosting and content delivery networks (CDN) for immediate application deployment.

TARGET MARKET

Yangazu Inc.'s flexible engineering expertise allows us to serve any organization committed to digital transformation and international exposure. We focus our efforts on two primary segments: Industry Verticals for our proprietary products, and Growth-Oriented Enterprises for our custom services.

1. Core Industry Vertical (High-Value Products)

This segment is defined by the success of your proprietary products, CrediHub and NkhokwePlus, providing immediate credibility.

- Financial Inclusion Institutions:
 - Focus: Microfinance Institutions (MFIs), SACCOs (Savings and Credit Co-operatives), and Village Banks (VSLAs).
 - Need: Specialized, secure, and reliable software (\$CrediHub\$ and \$NkhokwePlus\$) that handles complex financial transactions, regulatory compliance, and member/share management.

2. Growth-Oriented Enterprises (Custom Services)

This segment covers the clients who seek custom software and digital identity to expand their reach, like the school and camp examples.

- Small to Mid-Sized Businesses (SMBs) with Global Ambition:
 - Focus: Companies and individuals who are actively seeking to grow, professionalize their operations, and gain international exposure via the internet.
 - Need: Custom software solutions to automate unique business processes; professional, high-performance websites; and cohesive digital identity packages (logos, branding) that project a world-class image.
- Diverse Sectors (E.g., Education, Tourism):
 - Focus: Businesses across various industries (like Cherub Private School and Kachenga Bush Camp) that require expertly engineered digital platforms to enhance service delivery, client communication, and market reach.

LEADERSHIP

The strength of Yangazu Inc. lies in its technical leadership and commitment to engineering excellence. Our operations are led by individuals who combine deep software development expertise with practical industry experience and a focus on security.

Bentry W. Banda, Lead Software Engineer & Architect

Bentry W. Banda is the principal technical force behind Yangazu Inc., specializing in the development of secure, scalable digital systems across the banking, finance, and financial technology (FinTech) sectors.

Core Expertise

- **Software Development & FinTech Integration:** Specializing in building, auditing, and modernizing complex digital platforms, integrating innovative solutions into existing financial architectures.
- **IT System Architecture:** Expertise in designing robust, high-availability IT systems and infrastructure that ensure reliable, sustained performance.
- **Cybersecurity & Risk Management:** Bringing hands-on experience in implementing robust cybersecurity measures and secure coding practices to complex projects.

Credentials & Education

- **Certification:** Certified Information Systems Security Professional (CISSP).
- **Advanced Studies:** Currently pursuing a Master's in Information Technology.
- **Undergraduate Degree:** Bachelor of Engineering in Computer Science.

Bentry's unique blend of secure coding proficiency and a deep understanding of IT infrastructure and risk management makes him a vital contributor in today's software-driven economy, ensuring every project at Yangazu Inc. is engineered for security and longevity.

OUR HISTORY

Yangazu Inc.'s journey is defined by its commitment to engineering high-quality, impactful software solutions since its founding. Our history showcases our evolution from custom development to proprietary product ownership.

2021: The Founding

- **Foundation:** Yangazu Inc. was officially founded in 2021 with a mission to deliver superior software engineering and secure digital architecture to the enterprise market.

Key Achievements & Product Implementation

- **Proprietary Financial Software:** Successfully implemented and deployed NkhokwePlus, a specialized software solution designed for Village Banks (VSLAs) to manage transactions and savings efficiently. This marked a major step into proprietary product ownership within the financial inclusion sector.
- **Custom Financial Solution:** Development and deployment of CrediHub, a comprehensive Loan Management System for MFIs and SACCOs, demonstrating high-level technical expertise in financial system architecture.

Major Client & Partnership Milestones

We view every major project as a long-term partnership built on trust and technical excellence. Key partnerships and project milestones include:

Partnership	Industry	Project Focus
Tongole Wilderness Lodge	Tourism	Digital Platform Development / Bespoke Web Presence
Kachenga Bush Camp	Tourism	Digital Platform Development / Bespoke Web Presence
Cherub Private School	Education	Bespoke Web Presence & Digital Identity
